

**Specification:** In the specification:

Please substitute the following for the Abstract:

“A video device is provided that reduces an original frame rate of video frames by grabbing only every  $n^{\text{th}}$  video frame and substantially restoring the original video frame rate by reproducing a video frame up to  $n$  times or increasing the video frame rate by reproducing a video frame more than  $n$  times. In this way, the original frame rate is reduced without compression of the video data, and a higher frame rate may be restored without decompression.”

On page 1, after the title but before line 10, on a separate line, Please insert:

**Priority:**

“This application claims priority under 35 USC 119(e) of German patent application No. 103 15 0188.”

On page 1, before line 10, on a separate line, please insert:

**Field**

On page 1, after line 12, but before line 14, on a separate line, please insert:

**Background**

On page 2, after line 7, but before line 9, on a separate line, please insert:

**Summary**

On page 8, after line 18, but before line 20, on a separate line, please insert:

**Drawings**

On page 8, after line 31, but before line 1 of page 9, on a separate line, please insert:

**Description of Embodiments**
